## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see amendment, filed 7/21/2004, with respect to claims 1-32 have been fully considered and are persuasive. The rejection of claims 1-32 has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 1-16 and 25-32 are allowed over prior art of record.

The following is an examiner's statement of reasons for allowance: Ubale et al. (US Patent No. 5778335) disclose a multi-band CELP coding method for coding/decoding speech and music (*figures 1-7, the operation of the CELP is well known to a person of ordinary skill in the art*). Applicant's admitted prior art (*figures 1-2*) discloses a MB-CELP apparatus composing a plurality of LP synthesis filters for reproducing a signal corresponding to each particular band. Both prior art of record fail to specifically disclose a step of generating a residue signal by driving the LP inverse filter the difference between the original signal and the reproduced signal. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to include an LP inverse filter in such a way described above. Therefore, claims 1-16 and 25-32 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
